

**I will get vaccines at school
– a social script**

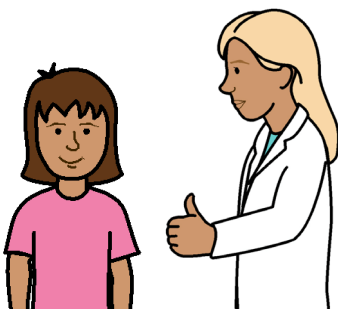

Introduction

I will get vaccines at school

A vaccine is a medicine that is given by a needle

Vaccines will help keep me healthy

On the day

My teacher will tell my class when it is time to get the vaccines

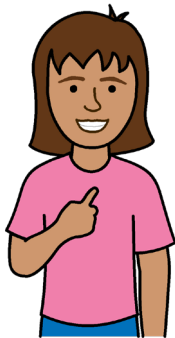

My teacher will take us to see the nurse

I will wait to see the nurse

Getting the vaccine

When it's my turn to get the vaccine, I will meet the nurse

The nurse will talk to me about what will happen

I will sit down to get the vaccine

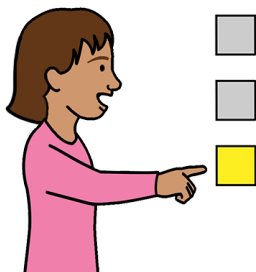

Getting the vaccine

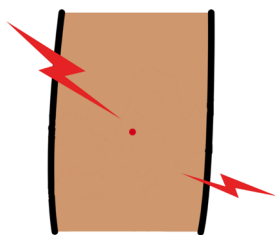

The nurse will give me a needle in my arm

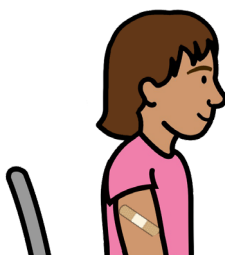

It might help me to think about something else when I get the needle

I can choose a way to think of something else before I go to get the needle

When I get the needle, I might feel a little sting or maybe nothing

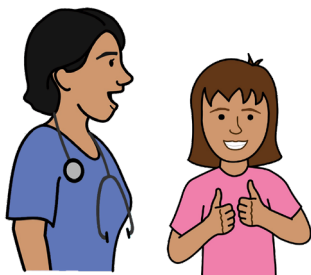

The nurse might put a band aid on my arm

After the vaccine

After I get my vaccine, I will need to wait until the nurse says I can go

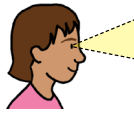

Before I leave the nurse will make sure I feel ok

Some things that might help me when I get the needle

It would help me to:

have a person with me

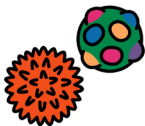

look at something interesting

listen to some music

look at my iPad

bring a sensory toy

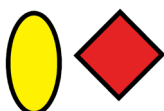

count to ten

lay down

I don't need anything

something else

Waiting after I get my vaccine

After I get the needle, I will need to wait until the nurse says I can go.

I can:

listen to music

look at my iPad

use a sensory toy

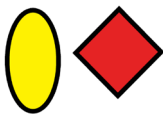

look at a book

have a drink of water

I don't need anything

something else

After I get my vaccine

The vaccine day is a big day.

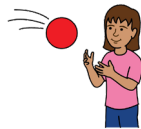

After I get my vaccine, I can:

feel proud

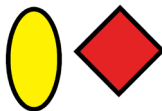

feel happy that it is done

do something fun

feel good that I have done something to help me be healthy

something else
