IBM Planning Analytics Workspace 2.0.94 - Fix List

Component	APAR	Description
Workspace	PH57304	**Hide hierarchy name** property setting is not always retained in Planning Analytics Workspace
	PH58344	Processes in a chore are duplicated if a change is made to the chore while it is executing
	PH58447	Copying objects using the mouse to highlight and select objects results in error: `the clipboard action could not be performed`
	PH58579	Planning Analytics Workspace does not close session after initiating a drill-through, resulting in excessive running `tm1odbcproxy64` processes
	PH59086	Selected title element sticks to the cursor in cube view configuration
	PH59429	Unable to update the super administrator's name in Planning Analytics Administration
	PH59502	Editing MDX to include StrToSet function does not work correctly
	PH59750	**Refresh after execution** option for an action button does not work when a process finishes with minor errors
	PH60020	Dimension selection list is picking up the color setting from the exploration row header after upgrade to Planning Analytics Workspace 2.0.93
	PH60024	Book import fails after upgrade to Planning Analytics Workspace 2.0.92
	PH60150	Pick list menu entries are not properly clickable
	PH60188	Default value is used in process parameter instead of list control type in Planning Analytics Workspace 2.0.93
