WESTALL Secondary College

iCreate Handbook

2023

www.icreatewestall.com

Introduction

iCreate is an elective program for all students in years 7-12 where, on Wednesdays, students have the opportunity to follow their passion and undertake personal development in a class made up of students from all year levels. As the classes are made up of students from a range of age groups, it is a great opportunity for students to integrate more fully into the Westall Learning Community whilst learning exciting and relevant skills.

iCreate subjects

Students can choose from the following iCreate subjects:

- Aviation
- Boxing
- Coding and Digital Design
- Duke of Edinburgh Certificate Adventurous Journey
- Landscape, Architecture & Design
- Martial Arts (Taekwondo)
- Master the Westall Café
- Masters of the Metaverse
- Sports Development
- STEM
- Study Space
- Visual Arts

Assessment

iCreate

Our students love the iCreate program. iCreate gives students the opportunity to follow their passions, as well as learn some vital life skills, which they will be able to transfer into their future pathways and eventually, the workforce.

Students undertake a range of short and long term projects as part of their iCreate program and these projects are student-driven, meaning that students create their own project and motivate themselves to ensure they meet the desired objectives over the project duration.

In addition to the creative freedom and real-world learning afforded to students as they undertake their respective iCreate programs, the program is closely mapped and aligned to the Victorian Curriculum General Capabilities. Students will undertake projects where they will be assessed against the four areas of the capabilities:

- Critical and Creative Thinking
- Ethical Capability
- Intellectual Capability
- Personal and Social capability

Aviation

Purpose:

The Aviation program offers students a pathway into the Aviation industry. This program involves a partnership with Tristar International Flight School based at Moorabbin Airport and will cover all aspects of the aviation industry including the pathway to becoming a pilot.

Content:

- Engineering
- Tourism
- Air Traffic Control
- Becoming a Pilot
- Air Host/Hostess
- Ground Traffic and Cargo
- The Business of running an airline

- Excursions to Moorabbin Airport
- Flying in a plane and on a simulator
- Building a Plane
- Introduction to Pilot's Licence through weekly lessons from Trister instructors

Boxing

Purpose:

The purpose of the boxing iCreate is to teach the sweet science of boxing. Boxing is an ancient and practical martial art form. There exists a misconception that boxing is about release of aggression, emotion and feeling. This is incorrect. Contrarily, boxing is about maintaining control, keeping calm, cool and relaxed, and staying focused. Boxing teaches fitness. It teaches control.

It teaches discipline.

Content:

- The boxing iCreate will cover the basic techniques and artform of boxing.
- It will also focus on improving fitness.
- It will set a regimen which will promote mental and physical health.

Activities:

Students will spend the first part of the lesson focusing on establishing the routine of boxing. This will include self preparation and they will learn how to:

- Wrap their hands to protect their knuckles and joints
- Warm up appropriately
- Stretch their muscles to avoid injury
- Develop basic footwork techniques
- Fitness strategies

The second half will be focused on boxing technique and practicing boxing.

Students will learn:

- The basic principles of boxing
- How to properly defend oneself
- The techniques of punching
- Proper footwork
- Balance
- Core strength
- Fitness

Coding and Digital Design

Purpose:

We live in the digital age: Code and technology power our digital world. Every digital device we own, website we visit, smartphone app we use, TV, calculator, microwave oven and even musical birthday card relies on code in order to operate. Along with code, Computer Aided Design (CAD) and Computer aided Manufacturing (CAM) help us engineer and make new devices. This makes coders and makers the architects and builders of the digital age. This subject aims to provide the opportunity to learn how to create code and use state of the are 2 and 3D manufacturing tools.

Content:

- Digital technology skills
- Coding languages
- Problem solving
- 2 and 3D Designing
- Introduction to micro-processors and electronics.

- Programming development in Python and C
- Design and manufacture with laser cutters and 3D printers
- Developing software bases projects including computer games
- Using micro-processors to construct digital devices
- Advanced robotics

Duke of Edinburgh Certificate – *Adventurous Journey*

The Duke of Edinburgh's (DoE) Award is the world's leading achievement award for young people and is highly regarded by Universities, Colleges and Employers. It encourages young people to develop independence, commitment, leadership and teamwork through being involved in a personalised program of activities.

DoE takes the place of Outdoor Education. However, Outdoor Education forms a key element of the DoE program.

Purpose:

Through engaging in the DoE, students will complete the structured youth development program to help students find their purpose, passion and place in the world. This program provides opportunities to learn a skill, improve their physical well-being, volunteer in their community and experience a team adventure in a new environment. Through engagement in this subject, the student will achieve a globally recognised certificate that is invaluable in opening up doors for job opportunities and university entry.

Content:

By engaging with and completing this globally recognised certificate students will:

- Develop and master a skill in any area of interest.
- Develop skills, knowledge and behaviours to be physically active now and into the future.
- Understand and experience the benefits of donating time to support the local community.
- Harvest a sense of adventure and discovery whilst undertaking a team journey or expedition

The program encourages students to explore the world in which they live and to become involved in their local communities. It provides them with the skills required to become independent, life-long learners who are confident, responsible and reliable.

- Develop and master a skill in any area of interest. This program will provide class time over a 12-week period in which for students to develop and refine their chosen skill with the assistance and guidance of experienced adult mentors. They will work independently or in small groups towards achieving their smart goal as set out at the beginning of the program. Students may choose any skill within reason. Examples include: Knitting, language, origami, public speaking, IT skills, painting
- Students will focus on improving their general health and fitness by dedicating a I2-week period towards a physical recreation activity of their choice. This can be time spent improving skills in a sport currently of interest or it might be an opportunity for students to try and new sport or activity, assisted once again by an experienced adult mentor.
- Students will develop their sense of pride for their community by volunteering a set period of time towards providing a service to the local community.
 Students may find their own area of passion but are provided with class time to explore and assist in understanding and revegetating the natural environment around Westall Secondary College. Other options for voluntary service include: sports coaching, charity work, school leadership positions, volunteering at an aged care facility, or emergency service such as SES.
- The program encourages a sense of adventure and discovery as students play a lead role in planning, organising and running a team journey or expedition to a location and setting of their choosing. Students take on all the key roles in organising an itinerary/ location before refining their skills on a practice journey before they take over the reins on their qualifying journey.

Landscape, Architecture & Design

Purpose:

If you want to improve the environment and communal spaces around the school through the successful use of Design and Technology, this is for you. You will investigate best Design Practice through excursions to local destinations where award-winning designers have created uniquely designed special spaces.

Be inspired by other landscaped areas and then use your drawing skills & Computer Aided Design to produce accurate design proposals to submit to appropriate school committees for approval. You will assist in the selection of tools and materials required for each project and effectively evaluate the success of the learning process and the landscaped areas.

There will also be the opportunity to volunteer your time in local schools, parks and gardens and here at Westall.

Content:

- Design for the Westall school environment.
- Design for a community environment at a local Primary School or other community group.
- Design for your home environment an individual project for yourself.
- Design & Project Management, Computer Aided Design (CAD), the safe use of both hand-held and power tools, landscaping tools & processes.
- Range of Materials: Wood, metal, plastics, brick, pavers and concreting.
- Range of Systems: Electrical Low voltage lighting, Hydro Water collection, storage, drainage, irrigation, and also Mechanical systems.
- Creative landscaping: Ergonomics & Sustainable development, Tree planting for wind protection & shade, Garden bed design, Mulching and Pathways.
- An outdoor furniture project for the school environment and a personal project to take home will be integral to this course.

- 3D printing/models
- Indoor/Outdoor Furniture
- Large 3d Sculptures

Martial Arts (Taekwondo)

Purpose:

- Taekwondo is a martial art that originated in Korea more than 1000 years ago. The art has become a global practice and is an Olympic sport.
- Taekwondo improves students' fitness, builds confidence, maintains discipline and allows for students to develop their strengths within the art. Students have many opportunities for leadership and collaboration with others across year levels.

Content:

The program conducts a grading at the end of each term to examine what the student has learnt in each term. The students will be assessed on Fitness, Taekwondo skills (the art) and reviewing their personal goals in what they want to achieve in the ICREATE Program. Students are also assessed using a variety of common assessment tasks (CATs), as is the case with other subjects at Westall SC. Coursework is aligned to World Taekwondo (Kukkiwon) as appropriate for students' belt-level and ages. Students can train and progress through the belt levels, from white belt to black belt. The grading test includes Poomsae (a sequence of learned techniques); self-defence; step sparring; combination kicks; sparring; board breaking (only for black belt grading) and terminology. Students must have 80% attendance to sit for the grading.

- Poomsae (patterns)
- Basic skills training
- Self-defence
- Sparring
- Martial Arts excursions
- Leadership opportunities
- Martial Arts games
- Taekwondo theory including Korean terminology
- The 5 Tenets of Taekwondo (Courtesy, Integrity, Perseverance, Self-control, Indomitable Spirit)
- Gradings

Masters of the Metaverse

Purpose:

With social media becoming a core part of our everyday lives, this subject aims to develop students' social, ethical, and technological awareness surrounding its use, implementation, and delivery.

Through topics such as ethics, algorithms, target audiences, advertising, and more, the subject offers an environment wherein students engage with all the Victorian cross-curriculum capabilities (Ethical, Intercultural, Personal and Social, and Critical and Creative Thinking). Furthermore, the subject is also inspired by parts of the Media and Technologies curriculums.

Furthermore, social media is a part of almost every workplace and in most forms of employment. Having students become 'masters' in social media management and use will improve their employability skills. The subject also provides a benefit for the school, as students will have a hands-on roll in promoting the school through its various current (and future) social media platforms, under the supervision and approval of staff.

Content:

Every year has a different 'theme' around which the curriculum, ideas, campaigns, and work is altered so that each year offers something. The content/structure of the terms would be similar each year in terms of foundational knowledge, extension, activities, and CATs, but the ethical questions, themes, and groups would alter.

The first three terms are very hands-on and project-based for students. In the first term, they complete 'mini-projects' where they test various production methods that they may use in their campaigns in the following to two terms. Terms two and three are where students work in groups to complete two different campaigns (one per team) for the school's social media. Each group completes a different type of social media campaign (podcast, Instagram series, tiktok videos, etc.), and the type changes each term, so all students experience different social media types. In the fourth term, students reflect on their campaigns – looking towards the future/next year to improve/change their strategies and campaign ideas. They do this in a creative way – completing a 'brochure' or 'advice column' for their future selves or students.

Year 1 - Culture

- Term 1 Behind the Screens
- Term 2 In Front of the Screens
- Term 3 Through the Screens
- Term 4 Beyond the Screens

iCreate

- Research
- Reflection tasks
- Analysis tasks
- Groupwork
- Hands-on activities
- Filming/recording/editing on computers, cameras, microphones, etc.
- Surveys and research
- Case studies
- Debates/discussions
- CANVA creative tasks (brochures, advice columns, etc.)
- Storyboarding, scriptwriting

Master the Westall Cafe

Purpose:

Westall Café provided students with an opportunity to be involved in running a bustling Cafe business for the Westall community. Students will take on a range of roles and responsibilities, including menu design, sweet / savoury cooking and mastering the art of coffee and other beverages. They will also have an opportunity to take the lead on the business side of Café, including: marketing, promotion, ordering, budgets, profit/loss and supply/demand. Throughout the year students will also be involved in special events, including a food culture excursion, mystery box cooking challenges, Primary School events and cooking and evaluating various dishes to enjoy within the Westall Café team.

Content:

- Cooking skills (savoury, sweet and beverage)
- Coffee skills (knowledge, skills and latte art)
- Business skills: Marketing, Promotion, Budgets, Ordering, Profit/Loss
- Front of house service/skills
- Building and maintaining a fruit, vegetable and herb garden (utilising seasonal produce)

- Cooking (sweet, savoury, beverage) and tasting
- Eating and evaluating food
- Beverage making (including coffee)
- Garden maintenance
- Designing a week of the Café menu
- Taking on a range of roles/responsibilities in the Westall Café, e.g. Head Chef (savoury dish) or Westall Eats delivery
- Evaluating and adjusting the Café business

Sports Development

Purpose:

Sports aims to develop the knowledge, understanding and skills to enable students to:

- Acquire, apply and evaluate movement skills, concepts and strategies to respond confidently, competently and creatively in a variety of physical activity contexts and settings
- Engage in and enjoy regular movement-based learning experiences and understand and appreciate their significance to personal, social, cultural, environmental and health practices and outcomes

Content:

- Students are involved in a number of individual and team sports.
- They learn the rules and procedures to enable them to participate in the various sports.
- Emphasis is placed on combining motor skills and tactical knowledge to improve individual and team performance.
- Students undertake a variety of roles when participating in sports such as umpire, coach, player and administrator and assume responsibility for the organisation of aspects of a sporting competition.

- Active play and minor games-Through minor games students are challenged to practise skills, including social skills, in a simple game situation.
- Fundamental movement skills
- Games and sports
- Rhythmic and expressive movement activities

Purpose:

- Students develop an understanding that science is about achieving knowledge through investigations, experiments, discussions and the communicating of ideas.
- Students learn to problem-solve and investigate.
- Students learn to design, build and test the research question.

Content:

Students investigate various topics of interest, such as, Botany, Neurology, Marine Biology, Animal Behaviour Anthropology, Astronomy, Zoology, and use various tools to collect, organize and record their experimental findings using correct formats.

Students design, build and test, their topic of interest, such as, Rotor Egg Drop, Bottle Rocket, Bridge Building, Elastic Launched Glider. Science categories covered will include Forensic Science, Nanotechnology, Human Science, Robotics and Electronics

- Challenges such as Rotor Egg Drop, Bottle Rocket, Bridge Building, Elastic Launched Glider.
- Mini-challenges such as paper airplane building and tower building.
- Enter their design in external competitions such as the 'Science talent search'

Study Space

(Year 11 & 12 VCE students only)

Purpose:

- Study Space and tutoring is an opportunity for senior school students to maximize their learning to manage their study program. It is designed to promote success in VCE.
- Students are developing key personal learning skills in managing time and resources to complete work set by their subject teachers as well as preparation for SACs and exams.
- Support is also provided to students by specialized teachers and university tutors available for individual and group tuition as well as access to programs.
- Students are expected to work both autonomously as well as having the opportunity to collaborate and work with small teams of students for peer support.

Content:

Students bring coursework to this program every Wednesday and use the time to revise and complete coursework, complete assessment tasks and prepare for exams.

- Study Skills Sessions
- Guest and Motivational Speakers
- Tutoring
- Exam Preparation
- Study Techniques
- Edrolo

Visual Arts

Purpose:

Visual Arts is a hands on program where students are given the freedom to explore their own creative ideas using both two and three-dimensional media. Students will develop skills in using materials, processes, techniques and technology. Students will gain confidence and independence working individually and collaboratively.

Content:

Students will be given the opportunity to develop skills in a Visual Arts area they are passionate about. The focus of this program is for students to be able to create, make, express, explore the visual arts in a stimulating and relaxed environment. Students will be gain first hand experience working with professional artists, participating in visual arts workshops and viewing a range of exhibition spaces.

- Sculpture and Ceramics
- Metalwork and casting
- Digital and Traditional Photography
- Textiles and Garment Construction
- Printmaking: stencilling, tee shirt transfers
- Painting and Drawing
- Visual Communication Design
- Film, TV, Video production
- Computer based animation, stop motion, hand drawn, cut out, special effects
